Home Centre Gets Advanced Racking

Al-Futtaim Auto & Machinery Company (FAMCO) has completed installing a sophisticated racking system at Home Centre's new distribution centre at Jebel Ali Industrial Area. Manufactured by Dexion, the racking system will be used for the storage of home furniture products.

Covering a total area of 23,957 sqm, the multi-tier long span racking system been designed with a goods-lift, lighting, fire-sprinklers and smoke detectors on all floor levels.

The structural integrity in the design and product ensures safety hundreds of staff working simultaneously at various locations on the mezzanine floors at peak hours.

"This was a very exciting yet challenging project for us and we are glad that it was not only successfully completed but also that it has strengthened our relationship with the client who has recently awarded us two new projects." said divisional manager Ayman Ahmed.

Following the completion of the Home Centre project, FAMCO has been awarded two additional projects from the same group for the supply and installation of various storage systems, at Babyshop's warehouse and at the Landmark Group facility in Jebel Ali Free Zone.
